**Subject: Letter of Recommendation - Oil & Gas Management Services Group**

To Whom It May Concern:

On behalf of Oil & Gas Management Services Group (OAGMSG), it is my pleasure to provide this letter of recommendation.

OAGMSG has provided an array of services for HKN Energy over the last three years including oilfield construction projects, fuel/water delivery, life support and a wide range of drilling and well-related services through its affiliated companies.

In HKN's experience, we have found OAGMSG to be a quality service company with the ability to get the job done for a fair price, even in a challenging and difficult area such as Kurdistan, Iraq.

As an example, OAGMSG constructed the drilling site and 8 kilometers of access roads for HKN's first exploration well in very rugged and mountainous terrain at 1500 meters elevation, which is subject to extreme climate and temperature changes. The project was completed on time and budget and has set a new standard in Kurdistan in terms of quality and durability.

OAGMSG has proven to be a quality service contractor to the oil and gas industry in Kurdistan and continues to commit itself to that purpose through its substantial investment in infrastructure, personnel and maintaining professional business relationships with its clients and affiliated companies.

Sincerely,

*Mark Jackson*
